

INDRUM 2026
Sixth conference of the International Network for Didactic Research in University Mathematics
June 15–19, 2026
Dubrovnik, Croatia

We are pleased to announce INDRUM2026, the sixth conference of the International Network for Didactic Research in University Mathematics, to be held June 15–19 in Dubrovnik (Croatia).

This conference is an activity of the International Network for Didactic Research in University Mathematics (INDRUM), which aims to contribute to the development of research in didactics of mathematics at all levels of tertiary education, with a particular focus on supporting new researchers in the field and on a dialogue between the communities of Mathematics and Mathematics Education. The themes to be addressed at INDRUM2026 will build on those addressed at the previous INDRUM conferences: INDRUM2016 in Montpellier (France); INDRUM2018 in Kristiansand (Norway); INDRUM2020 online from Bizerte (Tunisia); INDRUM2022 in Hannover (Germany); and INDRUM2024 in Barcelona (Spain). The target audience of this conference are researchers in the didactics of mathematics, mathematicians, as well as teachers and researchers who are interested in these issues.

The organisation of the conference will comprise: a plenary lecture, an expert panel, approximately six thematic working groups, a poster exhibition, and an early career researcher event. Pre-conference proceedings will be distributed to registered participants. The final version of the proceedings will be posted on the open archive HAL (<https://hal.archives-ouvertes.fr/INDRUM>).

The second announcement will present the scientific themes that will be foregrounded at the 2026 conference as well as information about how to register and submit a proposal. For more information, we invite you to consult the conference website that will be regularly updated: <https://indrum2026.sciencesconf.org/>
